

PCB DISPOSAL

At Emerald Transformer, we give our customers peace of mind that we will properly dispose or recycle their PCB waste. With decades of experience in PCB management at our nationwide network of facilities, our service teams are available for quick pick-up, testing, and disposal of your equipment.

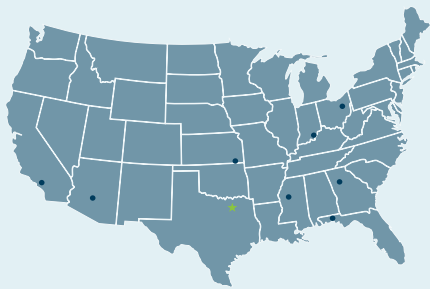

NATIONWIDE NETWORK OF EPA-PERMITTED FACILITIES

Emerald's PCB management facilities are EPA-TSCA permitted to treat, dispose, store, consolidate, and transfer all types of PCB waste. We manage the transportation and logistics, as well as the cradle-to-grave paperwork.

Our facilities can handle both liquid and solid PCB waste, and are permitted for alternative disposal methods that reduce the volume and toxicity of waste materials. Depending on regulations and customer preferences, we will ensure that your PCB waste is recycled, treated, incinerated, or landfilled. We can recycle approximately 97% of a transformer's weight in-house. Additionally, we offer in-house oil testing and analysis.

OUR SERVICES

- Transformer Repair
- Transformer Decommission
- PCB Disposal
- Oil Services
- Field Decommission
- Field Technical Services
- Sold from Stock
- Transformer Parts

- Nationwide Coverage
- 9 Locations
