- **EPA-Permitted Facilities**

WE WILL PURCHASE & DECOMMISSION YOUR USED ELECTRICAL EQUIPMENT

Emerald Transformer can purchase your end-of-life equipment and provide comprehensive decommission services, including removal, recycling, and PCB waste disposal. Due to our direct relationships with metal processors, our in-house oil recycling capability, and our ability to reuse transformer accessories for refurbishing, we can **maximize your asset's ROI**. We offer commodity-based pricing to capitalize equipment recovery value.

FROM PAPERWORK TO LOGISTICS, WE'VE GOT IT HANDLED

We emphasize safely detecting, analyzing, and handling PCBs, including high-concentration PCBs that contain 500 ppm or greater. We are permitted, insured, and trained to process hazardous waste, oil, etc. In addition, we can treat PCBs 2-49 ppm, allowing us to add value back to the oil and offer **competitive asset recovery payments** for both equipment and oil.

All equipment is tracked and paperwork is completed per EPA regulations. Certificates of Disposal are provided for every unit as required. All of our drivers are DOT certified to move hazardous waste.

In addition to dismantling and recycling equipment at our nationwide network of EPA-TSCA permitted facilities, we can also dispatch seasoned field crews for on-site dismantling of larger equipment and forensic teardowns. We make your electrical equipment decommission and the resale of your assets seamless.

WE BUY

- **Surplus Electrical Equipment**
- **Substation Transformers**
- **Distribution Transformers**
- **Transformer Oil**
