- EPA-Permitted Facilities

WE WILL PURCHASE & DECOMMISSION YOUR USED ELECTRICAL EQUIPMENT

Emerald Transformer can purchase your end-of-life equipment and provide comprehensive decommission services, including removal, recycling, and PCB waste disposal. Due to our direct relationships with metal processors, our in-house oil recycling capability, and our ability to reuse transformer accessories for refurbishing, we can maximize your asset's ROI. Additionally, we offer commodity-based pricing to capitalize equipment recovery value.

YOU DON'T HAVE TO WORRY, WE'VE GOT IT HANDLED

We manage the transportation and logistics, as well as the cradle-to-grave paperwork for PCB waste. We emphasize safely detecting, analyzing, and handling of PCBs, including high-concentration PCBs that contain 500 ppm or greater.

In addition to dismantling and recycling equipment at our nationwide network of EPA-TSCA permitted facilities, we can also dispatch seasoned field crews for on-site dismantling of larger equipment and forensic teardowns. We make your electrical equipment decommission and the resale of your assets seamless.

WE BUY

- Surplus Electrical Equipment
- Substation Transformers
- Distribution Transformers
- Transformer Oil
